Scotchcast™ Resin Cable Joint Kits

Speed Safety Reliability

- Fast & simple installation to reduce labour costs
- User safety with innovative resin handling system
- High quality resins & components for unmatched reliability

Scotchcast™ Resin Cable Joint Kits

The new 3M™ Scotchcast™ Resin Cable Joint Kit range is designed to make the installation process faster, safer and more reliable than ever before. Now available is a range of hydrocarbon resistant products specially developed for the oil & gas industries, as well as dedicated products to suit armoured cable types commonly found in mining and industrial environments. Additionally, all ranges feature new sizes and configurations, now catering to both inline and branch jointing applications.

Features available in the new 3M™ Scotchcast™ Resin Cable Joint Kit range include:

- “Express” one-part mould body with innovative sealing system requiring no cutting to size or taping, allowing unmatched speed of installation (excludes LVI-3 series, which uses a hydrocarbon resistant two-part mould body).
- Closed Mix-Pour with integrated resin delivery system. Designed to eliminate almost any chance of skin contact, user safety is increased and wastage from spills is minimised.
- High quality 3M resin compounds which offer confidence through renowned reliability, and provide durability to avoid costly re-work and system down-time.

Fully integrated resin delivery system

Benefit

This innovative design significantly reduces the chances of resin wastage, skin contact and vapour inhalation

“Express” one-part mould body with a top seal and fast fixing clips

Benefit

Simpler installation process and a reduced chance of resin leakage - no need for extra taping

Compressible foam seals at each end of the mould body

Benefit

Eliminates the need to cut and tape the mould body, regardless of cable size. Extra fast setup time, no tools required

NB: The colour blue has been used for illustrative purposes only.

The 3M™ Scotchcast™ Closed Mix-Pour resin system allows mixing and pouring of the two-part resin without exposure to the user. Further, no tools or mixing containers are required.

Sealed, two part resin bag

Integrated delivery system. Included nozzle accessory used for LVI-3 series

Internal mixing is safe and clean

Resin is released and safely poured in one easy step

3M™ Scotchcast™ Hazardous Area Resin Cable Joint Kit Range

3M™ Scotchcast™ Hazardous Area Resin Cable Joint Kits feature 3M™ Scotchcast™ Electrical Insulating Resin 1402FR. 1402FR resin is flame retardant, halogen free, and remains virtually unaffected by immersion in hydrocarbons and chemical solvents. When exposed to petrol, diesel and aggressive solvents, rapid deterioration can be experienced by standard encapsulating resins – especially those commonly found in conventional, low cost resin jointing kits. 1402FR resin is an ultra-high quality, highly modified resin that demonstrates superior performance compared to other encapsulating resin types. 3M™ Scotchcast™ Hazardous Area Resin Cable Joint Kits are recommended for industrial or specialist applications where hydrocarbons are present.
