Metallic Surround

Stainless steel is most robust and has higher corrosion resistance compare to other metals. The metallic surrounds and cover plates, no matter in metal veneered or full metal construction, are made with stainless steel. Better still, they are available in 3 colors and 2 finishes to add that touch of style to every application.

Metal veneered version
Strong stainless steel superb other metal veneered products.

Full metal version
Suitable for demanding environment.

Data communication excellence with Flexiport™

Concept has packed 2 patented innovations into a 120 x 70 mm wall plate to create the Flexiport™, which brings you the highest level of data communication performance.

The built-in 90 degree rotatable cradle plus the unique modular jack with integrated shutter make Flexiport™ the world's only data wall plate that offers both variable, multiple angle access AND ingress protection - cable bending and stress are minimized, ergonomic single one-handed plug-in action is enabled, while ingress protection is not compromised.

Designed specially for contemporary living with unparalleled dimension and definitive expression in slimness. Subtly styled and sensuously curved to respond to the lightest of touch and engage the sense from every vantage. Cleverly constructed with Polycarbonate material that's ever so hard-wearing.

Concept, will not only stand the test of time but convey the essence of aesthetic refinement to create a lasting impression.

About Schneider Electric

As the global specialist in energy management with operations in more than 100 countries, Schneider Electric offers integrated solutions across multiple market segments, including leadership positions in energy and infrastructure, industrial processes, building automation, and data centres/networks, as well as a broad presence in residential applications. Focused on making energy safe, reliable, and efficient, the company's 110,000 plus employees achieved sales of 19.6 billion euros in 2010, through an active commitment to help individuals and organizations "Make the most of their energy".

The LifeSpace Business of Schneider Electric provides solutions that represent the best in lifestyle and innovation for offices, hotels and homes. These solutions include award-winning products in the areas of building and home automation, structured cabling, and designer switches and sockets. They help the finest architectures around the world to achieve more with less.

Sensuous curves that set passion alight

Schneider Electric

Aesthetic excellence that adds style to contemporary décor

Distinct from the geometric forms commonly found in switches and sockets, Concept smoothes out the strong lines with the right degree of curves and at the right place, bringing a sense of sensual beauty. The slim profile is also elegant and unobtrusive.

Incorporating a white-on-white locator design, the white fluorescent blends harmoniously with the white dolly face of Concept switches. As unobtrusive as it can be during the day, the locators bathe the switches in a pleasant soft luminescent glow when darkness falls. Effortlessly blending both elegance and practicality, this is another example of Concept's unrivalled understanding of "form and function".
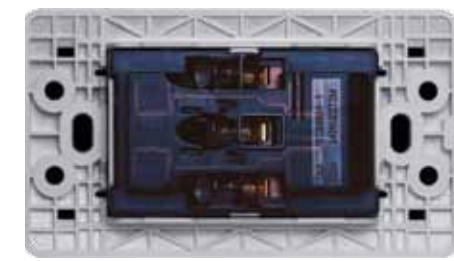

Easy and hassle-free installation

The mounting holes are reinforced with metal which avoid the risk of grid plate damage during installation. They are oval-shaped which enable easy fixing level adjustment. Cater to user-friendliness, Philips headscrews are used for flat or cross screwdrivers.

Front installation of modules facilitates a smoother installation process. It prevents modules from "sliding into the wall" after a long period of use.

Transparent housing enables easy viewing of mechanical functions. The web-grid design optimizes the balance between flexibility and rigidity. Installation of Concept is easy and hassle-free.

Certified Support to Inductive Loads

Concept switches are rated to the full as 16AX, which is technically superior to the 16A rating of common switches. That extra "X" denotes that Concept switches are tested and certified to handle inductive loads with high peak inrush currents with confidence such as fluorescent lights.
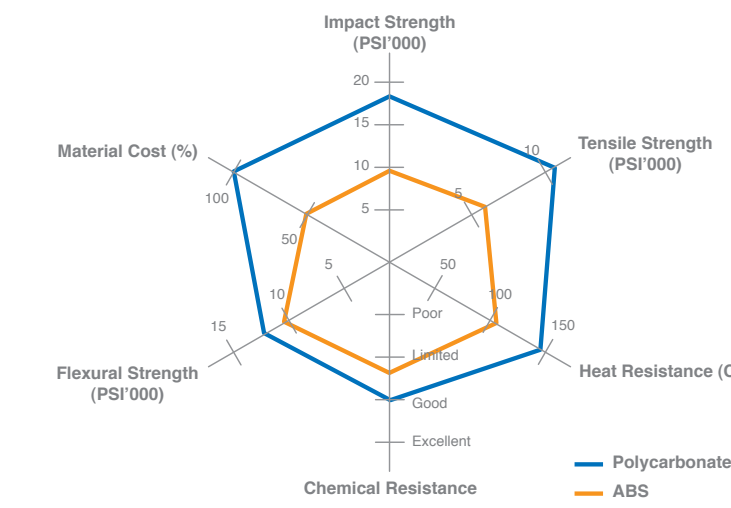

The Concept Advantages

Corrosion Resistant   Heat Resistant   Impact Resistant

The plastic parts of Concept is made of **polycarbonate**, a material superior to the commonly used ABS. With excellent impact resistance, polycarbonate has a well balance between tensile strength and flexural strength. It also has a wider temperature tolerance range and a good resistance chemical to attacks.

Being impact resistant, heat resistant, and corrosion resistant. Concept is made to stand the test of time.

Impact Strength (PSI'000)

Material Cost (%) — Tensile Strength (PSI'000)

Flexural Strength (PSI'000) — Heat Resistance (C°)

Chemical Resistance

— Polycarbonate
— ABS
